

Docket No. AUS920000797US1

ABSTRACT OF THE DISCLOSURE

METHOD AND APPARATUS IN A DATA PROCESSING SYSTEM FOR A
KEYSTORE

5

A method, apparatus, and computer implemented instructions for managing access to data in a keystore in a data processing system. A request for access to an
10 item of data is received from a requestor, wherein the item of data is encrypted using a key. A determination of whether the requestor is a trusted requestor is made. The key and the item of data are sent to the requestor in response to a determination that the requestor is a
15 trusted requestor.
